

## Expect more

Choose an HP ServiceOne Expert partner to get specialized expertise backed by the global resources of HP

Like many businesses, you may prefer to work with a local service provider – or one that specializes in your industry. However, you may also have a complex IT environment that requires extensive expertise to extend and manage. When you choose an HP ServiceOne Expert partner, you get the best of both worlds. HP ServiceOne Expert partners not only understand your industry, your region and you, but they also have ready access to the unparalleled technology resources and expertise of HP. They can harness the power of HP to solve even your toughest technical challenges and keep your business running all day, every day.

### Why choose an HP ServiceOne Expert partner:

- **HP ServiceOne Expert partners meet HP's most rigorous technical certification requirements**

You can be sure their professionals have a thorough understanding of HP solutions.

- **HP ServiceOne Expert partners are part of an exclusive group**

There are thousands of HP resellers, but only 800 HP ServiceOne Expert partners worldwide.

- **HP ServiceOne Expert partners are ideally suited to address your more complex challenges**

They have the experienced professionals and access to HP intellectual property required to design, deliver and support even complex solutions, such as cloud and converged data center.

- **HP ServiceOne Expert partners have a proven track record with HP**

HP carefully vets all HP ServiceOne Expert partners. This process includes a careful evaluation of their business models and practices.

- **HP ServiceOne Expert partners can stop problems before they affect your business**

Only HP ServiceOne Expert partners are authorized to use HP automated support technologies – like Insight Remote Support – to monitor your environment and take fast action whenever something goes wrong.

- **HP ServiceOne Expert partners can help you minimize downtime**

Only HP ServiceOne Expert partners have access to HP service delivery guides, firmware updates and patches, and spare parts.
